EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nils Pedersen on 9/10/08.

The application has been amended as follows:

IN THE CLAIMS:

Claim 10, Lines 2-3 "JIS (Duro-A) hardness" has been changed to --Duro-A hardness--.

Claim 11, Lines 2-3 "JIS (Duro-A) hardness" has been changed to --Duro-A hardness--.

The following is an examiner's statement of reasons for allowance: The closest prior art, Hosokawa et al. (US Pub. No. 2001/0030398 A1) fails to disclose a value of T_0/T_1 falling within .3. to .7, with T_1 being a thickness of said lip part at the area at which non-contact with said annular supporting part begins, and T_0 being a thickness of said end of said lip part and also fails to explicitly disclose a value $(D_1-D_0)/D_1$ falling within .03 to .15, with D_0 being an inner diameter of said end part of said lip part, and

Art Unit: 3673

D1 being an outer diameter of the shaft. And although Bertin (US Patent No. 4,167,981) discloses T_0/T_1 being of the order of 1 to 2, the combination of Hosokawa et al. in view of Bertin fails to disclose a value $(D_1-D_0)/D_1$ falling within .03 to .15. Since the present inventors have found that parameters $a = (T_0/T_1)$ and $[3 = (D_1-D_0)/D_1$ are important in order to prevent "scooped wear-out phenomenon" and "toppling wear-out phenomenon" and are effective in order to prevent the above-mentioned phenomenon when satisfying respective predetermined ranges of values simultaneously, and further have found the critical condition of the upper and lower limits concerning the parameters $a = (T_0/T_1)$ and $[3 = (D_1-D_0)/D_1$ by the results of an endurance test; there is no motivation, absent the applicant's own disclosure, to modify the Hosokawa et al. or Bertin references in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GILBERT Y. LEE whose telephone number is (571)272-5894. The examiner can normally be reached on 8:00 - 4:30, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia L. Engle can be reached on (571)272-6660. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
